HARSH DEEPAK KOKU

Full-Stack Java Developer | Computer Science and Engineering Student

harshkoku04@gmail.com | +91 97676 68505 | linkedin.com/in/harsh-koku-080845250 | github.com/harsh-koku

OBJECTIVE

To leverage hands-on academic training and hackathon experience in full-stack development to build robust, scalable software solutions. Seeking a challenging software engineering role to apply modern development practices, clean architecture principles, and high-performance system design to real-world problems.

TECHNICAL SKILLS

Languages:	Java, SQL, JavaScript (ES6+), C++
Backend:	Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices, API Gateway
Frontend:	Next.js, React 19, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3
Cloud & DevOps:	AWS (EC2, S3), Docker, Maven, Git, GitHub Actions, CI/CD, Ansible, Jira
Databases:	MySQL, PostgreSQL
SDLC & Design:	Agile, Microservices Architecture, System Design, Unit Testing, Iterative Development

PROJECT EXPERIENCE

AI-Based Citizen Grievance System | Java, Spring Boot, Hibernate, Next.js, React, MySQL, Python — May 2026 – Present

- Developed an AI layer integrated with a classic government portal to automate citizen grievance handling and resolution routing.
- Built a robust backend using Java, Spring Boot, and Hibernate ORM with a MySQL database to securely manage user data and grievance records.
- Designed a responsive, multi-language frontend interface using Next.js and React to ensure broad accessibility for diverse demographics.
- Integrated Python-based NLP machine learning models to seamlessly analyze and categorize text-based grievances.
- Utilized a Large Language Model (LLM) to analyze emotional sentiment of user inputs, enabling dynamic priority assignment for incoming grievances.
- Implemented an image authentication module within Java backend leveraging EXIF metadata parsing to detect and reject tampered evidence.

Deep Packet Inspection Engine | Java, Multithreading, Computer Networks, Socket Programming, OOP — Sept 2025 – Dec 2025

- Developed a Deep Packet Inspection (DPI) engine in Java to capture, parse, and analyze real-time network traffic.
- Implemented packet parsing, connection tracking, and protocol classification modules to organize packets into communication sessions.
- Used multithreading to process packet analysis tasks concurrently, improving responsiveness and throughput during traffic inspection.
- Built protocol analysis and traffic monitoring components to identify communication patterns and generate protocol-wise traffic summaries.
- Applied object-oriented design principles to build modular, maintainable, and high-performance networking components.

CERTIFICATIONS

• **PHP and MySQL Training** – EduPyramids, SINE, IIT Bombay (Nov 2025) | **Score: 72.22%** – PHP server-side scripting & MySQL database integration.

• **RDBMS PostgreSQL Training** – EduPyramids, SINE, IIT Bombay (Jun 2025) | **Score: 87.50%** – Relational database design & PostgreSQL query optimization.

• **C++ (Cpp) Training** – Spoken Tutorial Project, IIT Bombay (Jan 2025) | **Score: 80.00%** – Object-oriented programming fundamentals in C++.

EDUCATION

Raisoni College of Engineering, Nagpur – B.Tech in Computer Science Engineering	**CGPA: 8.49/10**	2023 – 2027
SGB Defence Services Academy – Higher Secondary Certificate (HSC) Class XII	**86.17%**	2022 – 2023
Dinanath High School & Junior College – Secondary School Certificate (SSC) Class X	**86.40%**	2020 – 2021

EXTRACURRICULAR & ACHIEVEMENTS

- **Smart India Hackathon (SIH) 2025:** Qualified internally for SIH 2025; selected among top teams at college level to represent in the national-level competition.
- **AWS Builder Summit 2026:** Participated in the AWS Builder Summit 2026, gaining exposure to modern cloud architectures, scalable deployment strategies, and industry best practices in AWS environments.
- **College Fest Website:** Collaborated within a 6-member team to design and develop the college fest website, implementing HTML5, CSS styling properties, and responsive layout designs to deliver an interactive experience.
